PROFILE INFO

I am an engineering student, having a keen interest in mobile application development mostly on flutter framework along with skills of website development, data science with python, and web development with HTML, CSS & JS .

PROJECTS

Vibeus Dating Application

Collaborated with my friends on a free dating application, using flutter as frontend framework and firebase as backend.

DG Society App

I have done internship in WebLord Infotech Technologies. I have work on Frontend of the application.

Music Genre Classification

Collaborated with my project partner on this project which is music genre classification. A music genre classifier is a piece of software that determines the genre of music in audio format. In this I have used CNN, ANN, and SVM algorithms. And In this I try to find the accuracy of my model using these algorithms .
